VOYEURISM DEMON

SEERSGATE:

I dreamed a dream that was not in Yahweh's nature. The focus of the dream took place in a sex store, and it gave others a longing in sinner ways against the King. Many demons were involved in this nudity and lusting feast.

THE GREAT WAY:

Sexual demons were the plan that you moved in before you came into My Kingdom. Sexual demons are more than lust: They would make you sleep with any and make you unashamed enough to walk around naked and publicly show sexual acts with others.

Voyeurism is also a demon. That demon once lived within you. You enjoyed having others watch you do any detail, but since that demon has been expelled, you hate it when people watch you walk down the street. A demon can bring this on to want attention based on how sexual you can be.

Voyeurism is a root demon infiltrating a prominent social media detail. Many on this social media outlet have cheated in their souls and committed adultery by looking at others who go on this web service showing their cleavage, legs, and sexual ways. Many have a great deal of their body showing so that others would lust after their way. Many enjoy others watching their way.

Advertisements target men and women. Websites use games and other seamless, harmless details to get a person hooked. And with that game, they post pictures of sexual temptation throughout the platform, giving the person many ways to fall and sin in their hearts. Married men are weak if their guard is down. They would become a habitual cheater **when** they serve this voyeur demon through the eye gates.

Many people are hooked, and many women willingly share a sexual way to look at, to make a competitive way with others.

All do not walk in this way.

Christians also want to be here. The way to get people to join this way is to let them share personal plans in hopes that others would listen and give their undivided attention. I will make it plain: The method of engagement utilized on social media platforms stems from a significant demon-based influence.
